

Abstract

The bachelor thesis „*Disinhibition forms and manifestation*“ focuses on the internet communication. Nowadays, mobile phones, Internet and other communication devices can use the Internet or your mobile phone to communicate for hours. Start of thesis deals with an introduction to the history of the Internet and cyberspace as an environment in which the Internet is. Then he deals with basic psychological aspects of communication in cyberspace. It represents a typical group of victims, and various methods of attack. It points out the advantages and disadvantages of Internet and social networks and their dangers, but also on the positive aspects of social networks and the Internet for young people.

The bachelor thesis can be used as a source of information to all who are interested in communicating on the Internet. And as a further inspiration to those who explore this area of communication.
